אינדקס מסמכי הפרטיות של הארגון ופריטי בדיקה C1-C13 (דו-לשוני)

מסמך	אינדקס מסמכי הפרטיות של הארגון ופריטי בדיקה C1-C13 (דו-לשוני)
נתיב המקור	docs/privacy/README.md
גרסת המקור	origin/main @ b6eb212ec
הוכן לחבילה	2026-10-24
מצב	הנוסח המקורי נשמר ללא שינוי; עיצוב בלבד. טיוטה לבדיקת עורך דין, אינו ייעוץ משפטי.

Privacy documents for an organisation using SmplWise Arx / מסמכי פרטיות לארגון המשתמש ב-SmplWise Arx

Status: DRAFT, documents and text only (no product code changed). Not legal advice; nothing here promises compliance with any law. Facts were verified by reading the code and migrations of `origin/integ/290` @ `018795f96` (2026-10-19) and cite file paths. Every statement that needs a lawyer is marked **REQUIRES COUNSEL REVIEW (Cn)**. אין זו חוות דעת משפטית ואין כאן הבטחה לעמידה בדין. העובדות אומתו בקריאת הקוד וההגירות; כל קביעה שדורשת יועץ משפטי מסומנת. סטטוס: טיוטה, מסמכים וטקסט בלבד (לא שונה קוד מוצר).

Source of the task: backlog item `privacy-org-documents` (decision 10 of the technician-privacy decisions of 2026-10-18: a database-definition template, a retention policy, an incident-procedure line). The lawyer-bound analysis stays in the internal legal pack and is not copied here.

Index / אינדקס

עברית	English	Document	#
he/01	en/01	Data-processing summary: what the product stores, where, who receives it	01
he/02	en/02	Retention and access summary (what is deleted automatically, what is manual, who can see what)	02
he/03	en/03	Steps for handling people's requests (access, correction, deletion)	03
he/04	en/04	Organisation privacy notice template	04
he/05	en/05	Database definition document template + incident-procedure line	05
he/06	en/06	Retention policy template	06

Technician notice, final wording in he / en / ar / ru (pending legal review): technician-notice-final.md.

01-03 are factual. 04-06 are templates the organisation fills in and sends to its counsel. The English files are the exact source; the Hebrew files follow them section by section. Related security material: `docs/security/` (identity and RBAC, dependency and secrets audit, tickets public-surface checklist).

Counsel-review items / פריטים לבחינת יועץ משפטי

Where marked	Question (not answered here)	Id
01, 04, 05	Roles: who is the database owner / controller / holder, SmplWise as supplier or processor, any supplier access for support	C1

Where marked	Question (not answered here)	Id
01, 04	Notice versus consent for technicians; the vendor (or manager) attesting on the technician's behalf; sufficiency of the n2 notice wording and of "no legal obligation to provide"	C2
01, 02, 04, 06	Open-ended retention ("until the organisation deletes it") for directory persons and door-system persons; whether the notice must state a period	C3
01, 04, 05	Whether a database definition document / registration / a security level applies; whether the listed measures are adequate	C4
01, 04, 05	WhatsApp through an unofficial Home Assistant component, Meta metadata, transfer abroad, platform terms	C5
01, 04, 05	Cloudflare tunnel carrying public pages (names and phones typed on them), processing agreement, location of servers	C6
01, 02, 03, 05, 06	Door system (WisKey): retention of entry records and entry pictures (not verified), access by an outside maintainer	C7
01, 03, 05, 06	Where the host, disk and backups are; backup copies; deletion versus backups	C8
01, 04	Staff phone app (location/presence, required-sensors policy, employment-law implications), push relay operator and location	C9
02, 03, 04, 06	Mandatory retention (financial 7 years, audit 365 days) versus deletion requests; exceptions	C10
02, 03, 05, 06	Requests from people: who may ask, identity checks, deadlines, fees, exemptions, completeness of a manual export, what to tell the person	C11
05	Incident duties: whom to notify, thresholds, deadlines	C12
01, 04	Camera frames / event pictures and any surveillance-specific duties (video itself is outside Arx)	C13

Places where the code does not match an existing notice, brief or decision / אי-התאמות

Verified on `origin/integ/290` @ `018795f96`.

1. **Closed tickets are never purged automatically.** `purge_after` (closed + 730 days by default, `B/services/tickets/monitor.py`, `service.py`) is written on the ticket, but no code deletes tickets when it passes; `B/services/tickets/retention.py` says the purge "belongs to the slices that own those tables" and none was found. The retention key `retention.closed_days` is read by `monitor.py` but is absent from the settings schema (`B/services/tickets/settings_doc.py`). Any statement of "closed tickets are deleted after N days" would currently be untrue.
2. **Technician notice n2 versus the lead's technician-privacy decisions of 2026-10-18.** n2 (`NOTICE_TEXT`) points to "the building manager", not the organisation's name (decision 1); the entry-code message begins with the product name "SmplWise Arx:" (`TEMPLATES`), not the organisation's name (decision 8); the phone-verification message to the technician (`B/services/tickets/message_templates.py`, `phone_verify`) carries no privacy line (decision 2). The vendor-attests notice model (decision 3) and the four languages (decision 7) are in the code.
3. **Technician id in the log (decision 4):** the technician's contact id is in the notice-acknowledgement audit row (`acknowledged_for`) but not in the `access.grant.request` / approve rows

(`B/services/access_grants.py`); the grant row that links the two is deleted 12 months after the grant ends, the audit row stays 365 days by default.

4. **The 2.7.1 legal brief is partly out of date.** It says there is no reject action and the notice is second-person and he/en only. On integ/290 "reject and delete" (`reject_pending_contact`), the "needs review" report with yearly reminder (`B/services/needs_review.py`) and notice n2 in four languages exist. The brief's note that the contact export lacks access grants is still true (`B/services/tickets/contacts.py export`).
5. **Notice n2 versus the system's own retention behaviour:** n2 says data is kept "until the organisation deletes it, in line with its retention policy". The code has no such policy object; the manual steps and the "needs review" report are the only mechanism, and until an organisation writes a policy (document 06) the sentence refers to something that does not exist.
6. **Entries and pictures:** the notice says each entry's time and door (and a picture where enabled) are kept. Arx stores no door events; they live in the door system, whose retention was not verified (C7).
